ACO Drain®

## KlassikDrain

### Brisbane Broncos' Training and Administration Centre, QLD

The Brisbane Broncos is an iconic sporting club in the National Rugby League (NRL) competition. The club recently built a new \$27M training facility near its traditional home at Red Hill. The new facility includes a three-storey building for all of its football operations and commercial facilities including a retail store, café, gymnasium, aquatic centre and a community education centre. The centrepiece of the development is a full sized training field, developed as a result of a commercial arrangement between the Broncos and the Queensland Government.

#### Project Design Brief

In keeping with the modern look of the new building, designers needed to visually integrate a variety of different external pavement surfaces. As these areas would also be heavily trafficked by pedestrians, all pavement transitions needed to be smooth and surfaces safe to walk on. Designers therefore chose a variety of efficient surface drainage systems to effectively drain these flat areas, whilst ensuring their appearance complimented the building's modern exterior.

#### ACO Solution

- **KlassikDrain** KS100 with Stainless 5-Star **Heelsafe**® *Anti-Slip* grates

#### Benefits

- The 0.5% built-in slope in the KS100 system allowed the new pavement to be constructed as flat as possible and still provide efficient flow to the outlet
- Stainless 5-Star Heelsafe® *Anti-Slip* grates provides slip resistance to AS 4586
- Stainless 5-Star Heelsafe® *Anti-Slip* grates and the integrally cast stainless steel rail, provides the aesthetic finish required by both the client and designers

#### Other ACO Products Used

- Trench drains (ACO Drain), floor wastes (ACO Wexel) and bathroom drains (QuARTz by ACO)

PF2019-2B
