

KlassikDrain

The Craft & Co., Collingwood, VIC

The Craft & Co. is a multi-faceted business venture situated in a two-storey warehouse in Collingwood. The venue houses a restaurant, cafe, bar, microbrewery, distillery, winery, wood fired bakery, coffee roaster, cured meat and cheese making rooms. The business supports local Australian producers and provides a social environment for shopping, eating, drinking, learning and making products.

Project Design Brief

The microbrewery and distillery required an adaptable and efficient drainage system capable of withstanding the cleaning chemicals used several times a day to hygienically clean the equipment and floor areas. The drainage system needed to connect to the existing underground warehouse pipework. Foot-friendly grates were also required for the safety of visitors to the site.

ACO's Solution

- **KlassikDrain** KS100 with Stainless 5 Star **Heelsafe**® Anti-Slip grates

Benefits

- The K100 sloped system provides 5mm of fall per metre length of channel to ensure sufficient runoff to the drain outlets
- Vertical knockouts are located in specific channels allowing for easy and flexible connections to existing pipework
- Stainless 5 Star **Heelsafe**® Anti-Slip grates meet pedestrian safety requirements to AS 4586
