PF201211

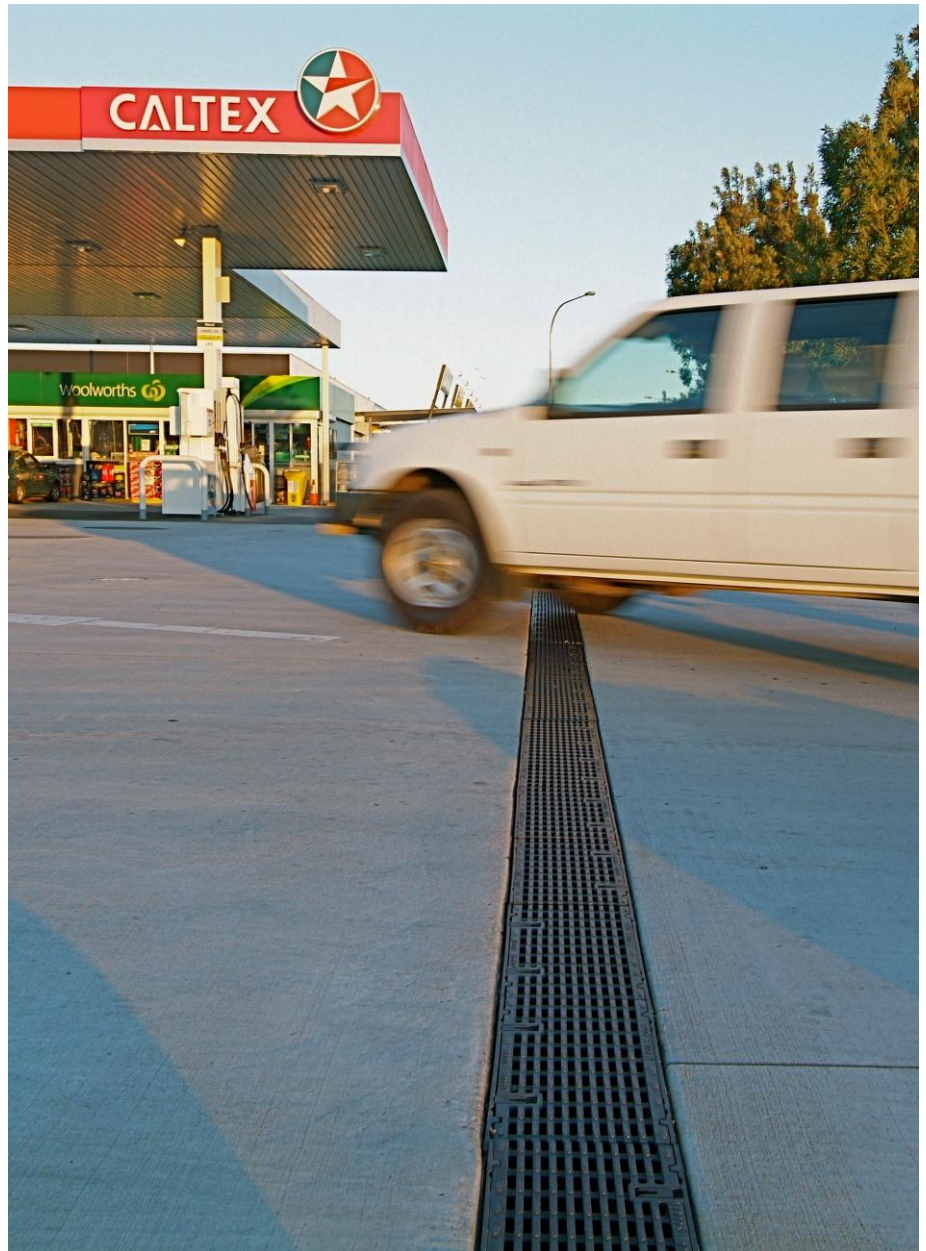

Caltex Service Station, Canberra

Woolworths' National Construction and Engineering Division recently sort assistance from ACO to help set a standard for its trench drainage. For each new or upgraded site, the standard calls for ACO's PowerDrain to be selected according to the following categorization:

- *PowerDrain, S100K (100mm wide drain) – pavements adjacent to the fuel pumps*
- *PowerDrain, S200K (200mm wide drain) – for access thresholds*

ACO's Intercept Iron grates were also selected to withstand all typical wheel loads (including full tankers). The S100K system comprises sloped channels, ideal for the flat pavement beneath the canopy areas.
