Joondalup Golf Resort, WA

Joondalup Resort is located 25 minutes north of Perth's CBD and offers 70 spacious accommodation rooms, championship golf course, conference facilities, wedding reception areas and fine dining restaurants. Recently, alterations were added to the conference area including covered decks and a courtyard.

Project Design Brief

Designers wanted to ensure that the new external pavements would be well drained and safe during wet weather. Pavements in the courtyard areas also needed to be free from undulations and safe for women's heels.

ACO's solution

- KS100 trench drainage system with modular channels configured to produce a sloped run with built-in falls
- 5 Star Stainless Steel **Heelsafe**® *Anti-Slip* grates

Benefits

- Sloped channels with 0.5% built-in fall allows for efficient drainage on flat pavements
- Integrally cast stainless steel edge rails provides a visually straight restraining edge for the pavers
- 5 Star Stainless Steel **Heelsafe**® *Anti-Slip* grates ensures pedestrian safety

Other ACO Products Installed

- Access covers
- Cable pits
