## Surfers Paradise Foreshore

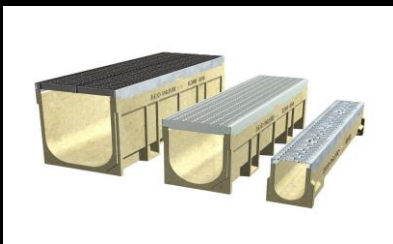

*The Surfers Paradise Foreshore redevelopment is flanked by Laycock Street and View Avenue.*

*The purpose of the \$25m upgrade is to reconnect the heart of Surfers Paradise to the beach. It is also to create a safe, accessible public space with improved recreational opportunities and necessary infrastructure for major events.*

*A wide pedestrian promenade encompassing barbecues and picnic areas required trench drainage. Designers selected long runs of sloped KlassikDrain KS100 to minimise connection to the underlying stormwater pipe.*

*Grade 316 stainless steel Heelsafe® Antislip grates were also specified for durability in the salt water environment.*
