Viridian Glass Manufacturing Plant

Viridian Glass recently invested in a state of the art manufacturing facility in the Perth suburb of Jandakot. The new factory is equipped with a modern kiln and double glazing facility.

Viridian required a drainage solution that would cater for the removal of recycled wash down water adjacent to their glass cutting machines.

Designers specified sloped KlassikDrain to ensure liquid velocities were maximized so that solid build up would be minimized thereby optimizing the wash down process.
