

Water Park, The Esplanade

Water Park, The Esplanade

Wynnum Manly's Water Park, a recently opened \$770,000 playground, complete with waterslide is a very popular summer destination for locals and tourists with kids.

Designers required a grated trench drainage system to collect the runoff from the water feature located beachside of The Esplanade. Almost 50 metres of **KlassikDrain, K100** was installed for the application. Each half metre modular channel (100mm wide) and grate was mitered to ensure the trench run traced the radial contour of the water feature. **Heelguard Stainless** grates were fitted to ensure that children's fingers would not be trapped and that the drain would be visually appealing.
